EDUCATION BACKGROUND

Purdue University Ph.D. Student in Computer Science Ross Fellowship	<i>Aug.2022-Now</i> <i>West Lafayette, U.S.</i>
University of Southern California Master of Science in Computer Science Cumulative GPA: 4.0/4.0 USC Honors Program	<i>Aug.2020-Aug.2022</i> <i>Los Angeles, U.S.</i>
ShanghaiTech University Bachelor of Engineering in Computer Science Cumulative GPA: 3.66/4.0 Ranking: 10/116 TOEFL: 105 My Best Score: 109 GRE: 323+4.0	<i>Sep.2016-Jun.2020</i> <i>Shanghai, China</i>
University of California, Berkeley Summer Session GPA: 4.0/4.0	<i>Jul. 2017</i> <i>Berkeley, U.S.</i>

RESEARCH EXPERIENCE

Pretty and Shiny! Visual Saliency-guided Curiosity for Self-Supervised RL. iLab Supervisor: Laurent Itti Objective: To propose a deep reinforcement learning algorithm using saliency curiosity mechanism to improve the performance in exploring the environment. Core contents: <ul style="list-style-type: none">To propose a novel reward with saliency curiosity.To train the agent explore the environment mimicking the performance of human.To navigate the agent with the information retrieved by the exploration phase.	<i>May 2021-May 2022</i>
Speech Drives Templates: Co-Speech Gesture Synthesis With Learned Templates. <i>Accepted by ICCV 2021</i> SVIP Lab Supervisor: Shenghua Gao Objective: To propose a unified model to generate gesture of a talking person given the audio of the speech. Core contents: <ul style="list-style-type: none">To generate speech audio aligned talking gesture.To guarantee the generated gesture to be smooth with variety.To propose a valid metric to assess the quality of generated gesture.	<i>Sep.2020-Aug.2021</i>
Liquid Warping GAN with Attention: A Unified Framework for Human Image Synthesis <i>Accepted by IEEE TPAMI</i> SVIP Lab Supervisor: Shenghua Gao Objective: This project is to improve the performance of the result of human image synthesis, in terms of higher resolution, more stable and smoother synthesized image. Based on the ICCV paper “Liquid Warping GAN: A Unified Framework for Human Motion Imitation, Appearance Transfer and Novel View Synthesis”, we propose a more advanced network architecture to achieve these. Core contents: <ul style="list-style-type: none">We propose an Attentional Liquid Warping Block (AttLWB) to pursue more stable and smoother results.We apply one/few shot learning to improve the generalization of our proposed model.Our model can achieve higher resolution results (512 x 512) and the previous ICCV paper can only handle 256 x 256 resolution.	<i>Sep.-Dec.2019</i>
SUNet: A Lesion Regularized Model for Simultaneous Diabetic Retinopathy and Diabetic Macular Edema Grading <i>Accepted(oral) by IEEE ISBI 2020</i> SVIP Lab Supervisor: Shenghua Gao Objective: The approach is to propose a multi-task CNN to improve the performance of diabetic retinopathy and diabetic macular edema grading at the same time. Core contents: <ul style="list-style-type: none">Proposed a multi-disease network (SUNet) for simultaneous grading DR and its complication DME. As far as we know, this is the first work for simultaneous DR and DME grading;Introduced a lesion regularizer module into the disease detection network which enforces network concentrates on those lesions, meanwhile segmentation also provides a cue for a doctor to better understand the prediction results;Designed a SUNet to interleave feature maps for the multi-disease diagnosis and lesion regularization, and it is a novel multi-task learning framework, which can be readily applied to other multi-task learning scenarios.	<i>Jan.-Jun.2019</i>

Pattern-learning-based Noise Elimination Algorithm in Photoacoustic Sensing and Imaging

Nov.2017-Feb.2018

Accepted(oral) by *IEEE EMBC 2018* | [HISLab](#) | Supervisor: Fei Gao

Objective: The method is to eliminate the noise interference of photoacoustic signals by learning the pattern of the noise signal.

Core contents:

- Designed an algorithm to learn the pattern of the noise interference in photoacoustic imaging;
- Designed a method to locate the phase position of the noise signal;
- Evaluated our method with preceding methods.

PROFESSIONAL SKILLS

Programming Languages: Python, MATLAB, C/C++, Java, Rust, MIPS

SDKs & Tools: pyTorch, Git, Linux Shell, OpenGL, MULTISIM, \LaTeX

CONFERENCE EXPERIENCE

ICCV 2021 Online	Oct.2021
IEEE ISBI 2020 Online, Oral Presentation	Apr.2020
MICCAI 2019 Location: Shenzhen, China	Oct.2019
<i>Undergraduate Student Travel Award</i>	
ASSIST 2019 Location: Shanghai, China	Aug.2019
IEEE EMBC 2018 Location: Hawaii, U.S.	Jul.2018

WORKING EXPERIENCE

Teaching Assistant at Viterbi School of Engineering at University of Southern California	Sep.2021-May.2022
Research Assistant at SVIP Lab of ShanghaiTech University	Sep.2020-Jun.2021
Teaching Assistant at School of Information Science and Technology of ShanghaiTech University	Sep.2019-Jan.2020

SOCIAL EXPERIENCE

Management Assistant of School of Information Science and Technology	Sep.2018-Jan.2019
Volunteer of Campus Assessment Days of ShanghaiTech University	2018-2019
Member of department of new media of the Students Union	Jan.-Mar.2018
Editor-in-chief of a school magazine, Shuyuan NEWS	Mar.2017-Mar.2018
President of literature club of ShanghaiTech University	Mar.2017-Mar.2018
